

Paolo Fiol

paolo.fiol97@gmail.com | Plantation, FL | <https://paolofiol.com/>

Software Engineer with 3+ years of experience building production SaaS and AI-driven automation. Recent work spans browser automation agents (TypeScript, Playwright) for healthcare EHR workflows on AWS, LLM integration with Amazon Bedrock, Gemini, and OpenAI, and full-stack development with React/Next.js and PostgreSQL. Focused on reliable, auditable systems in regulated environments.

Work Experience

Independent Software Engineer

March 2026 – Present

Beacon Health — EHR Browser Automation Agent (Contract)

Aug 2026

- Built a browser automation agent (TypeScript, Playwright, Node) on AWS EC2 via Systems Manager that runs a clinical pre-charting workflow end to end in an EHR — reading chart data, populating a visit-note template, and drafting a patient letter
- Diagnosed a silent data-integrity failure caused by lazily loaded chart content and added provenance logging recording the source of every extracted value, making runs auditable after the fact
- Benchmarked three automation frameworks and documented spin-up times, failure modes, and safety guardrails (draft-only writes, identity verification, constrained model output) to guide platform adoption

Resume Reframe - <https://resume-reframe.com/>

- Built and deployed a full-stack, AI-powered resume tailoring SaaS with Next.js 15, PostgreSQL, and Drizzle ORM, integrating Google Gemini to generate job-specific resumes and cover letters from pasted job descriptions
- Implemented email/password and Google OAuth authentication, an application-tracking dashboard, .docx export, and .pdf/.docx resume upload parsing, with per-user rate limiting via Upstash Redis and subscription billing via Stripe

Software Engineer, Tata Consultancy Services

July 2022 – Oct 2025

- Led feature development for workforce management suite serving 60K+ employees with AngularJS & Node.js
- Designed and optimized database queries, migrating multiple legacy queries from using subqueries to table joins
- Maintained our automated CI/CD scripts and delivered an optimization that cut our test pipelines times by 50%
- Mentored junior engineers through code reviews and pair programming sessions

Skills

Programming Languages: TypeScript, JavaScript, Python, Java, C++, SQL, PostgreSQL, HTML, CSS

Frameworks / Libraries: React, Next.js, React Native, Angular, Playwright, Node.js, Express, OAuth, Tailwind CSS, Drizzle ORM

Tools / Platforms: AWS (EC2, IAM, SSM, Bedrock), Linux, Docker, Git, Supabase, Vercel, Stripe, Azure DevOps, Postman, Redis

AI Tools: Amazon Bedrock, Claude, Google Gemini, OpenAI API, Claude Code, Codex, Copilot, LLM integration, prompt engineering, agentic & browser-use automation, structured output validation

Education

University of Florida – Bachelor of Science in Computer Science

Graduated May 2022

- **Coursework:** Data Structures & Algorithms, Database Systems, Operating Systems, Software Engineering
